

Creating a revolution of social innovators

Summer programs for young innovators ages 9-15 to develop and enhance entrepreneurial and technical skills.

Guided by entrepreneurial and tech-savvy instructors, youth dream up their own business, test and validate their ideas, design logos, build an online portfolio, and learn to think and act creatively.

By the end of the program, students will be equipped with all the tools necessary to kick-start their own enterprise.

Startup Skool is a social enterprise educating youth about entrepreneurship, design thinking, and technology. This August 2016, we're bringing our summer programs to Kelowna! We're looking for entrepreneurs and innovators from startups to large scale companies to collaborate with! Join us as a guest speaker, offer a tour of your office, help us create a case study around your business to include in our curriculum, or even act as a dragon for Friday Pitch Days!

Examples of Partnerships:

- Recon sharing a 20 minute prototyping lesson using the Jet
- Unbounce sharing a 45 minute lesson on marketing
- Hootsuite developers acting as mentors during our coding lessons
- Tours of Launch Academy, Besties Restaurant, Whitecaps headquarters etc.
- Various entrepreneurs came and acted as "Dragons" for our Friday Pitch Day!
